REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a process for determining whether to inspect an aluminum electrolysis cell for a crust hole wherein the process comprises operating the cell having a hooding connected thereto so that fumes are confined via the hooding and a crane is used to house an IR sensor that is used in sensing infrared radiation on the outer surface of the hooding to obtain thermal imaging of the hooding wherein the thermal image is sent to a data processor wherein the actual temperature of the hooding is extrapolated from the thermal image through the data processor where when the actual temperature varies from a target hooding temperature by more than a preselected temperature, the crust of the aluminum is inspected for a crust hole. A system having the aluminum cell, hooding for confining the fumes, a crane that travels adjacent to the cell, an IR sensor mounted to the crane to scan the hooding and a data processor that extrapolates the actual temperature of the hooding based on a thermal image of the hood and to compare the actual temperature to a target hood temperature and transmit the thermal image to the data processor is not disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
